EPA is committed to working closely with response agencies and state and local officials to ensure the safety of citizens, respond to concerns and to evaluate impact to water contaminated by the Gold King Mine Release. EPA is sharing information as quickly as possible with the public as experts work to evaluate any effects the spill may have on drinking water, public health, agriculture, fish and wildlife. Please see our website for the latest information: <http://www2.epa.gov/goldkingmine>
Regular updates will be posted as they are available.
EPA Hotline: 844-607-9700

Hi:

I don't know why you at the EPA don't just get the water clean up experts from Canada down to remove the pollutants from the stream. Companies like Maple Leaf Developments can suck all the garbage out and return clean water with no problem. They already have equipt in Texas so they could easily relocate it to your site and do the clean up.
